Carve™ Xtra

Active Ingredients: Prothioconazole 15.79%, Azoxystrobin 17.54%

Broad-Spectrum, Preventive Turf Fungicide

Carve™ Xtra is the go-to fungicide for golf course turf, delivering powerful, broad-spectrum disease control with both systemic and curative activity, proven resistance management, and trusted performance for superintendents and turf managers.

Carve Xtra is a robust fungicide combination of the DMI ingredient prothioconazole and the broad-spectrum fungicide azoxystrobin, featuring dual mode of action, residual activity for best-in-class disease resistance. Both work to perform in all temperatures, especially high temperatures, to reduce the risk of turf response. This product will control many summer diseases on turfgrass including leaf and stem blights, leaf spots, patch diseases, mildews, anthracnose, fairy rings, molds and rusts.

FEATURING

- ✔ A powerful DMI and strobilurin which combine to manage fungicide resistance and provide excellent disease control
- ✔ Excellent turf safety, rainfastness, fast efficacy and residuality

Key Features and Benefits

- Broad-spectrum disease control and spore germination inhibitor for 13 turf diseases, including dollar spot, brown patch, anthracnose, fairy ring, leaf spot, and snow mold
- Protects the plant via absorption through the leaf blades and roots
- Disease control uniformly throughout the plant even to new growth, through systemic xylem mobility
- Carve Xtra contains azoxystrobin and prothioconazole, two different modes of action that work together to perform even in high temperatures to reduce the risk of turf response
- Fits well in all golf turf types and in the transition zone where turf mixes are common
- Applied as a foliar spray and fits easily into rotational or tank-mix programs with other registered products
