ETQ® Flex | Active Ingredient: Proprietary Complex Colorant Blend

Peak Performance With Flexibility

The exclusive Enhanced Turf Quality® (ETQ) technology combines a proprietary complex blend to provide maximum protection against heat and drought stress events. ETQ® Flex technology is absorbed into the plant, providing protection all the way to the roots. The harmful effects of UVB (burning) and UVA (aging) are diminished, while the plant is protected, allowing critical functions like respiration and photosynthesis to function normally, optimizing turf health.

Maintain healthy, beautiful turf with the flexibility of use with other commonly applied products on golf courses, athletic fields and residential lawns. Ultimately, turfgrass professionals can preserve healthy turf under extreme heat and drought stress conditions.

FEATURING

- ✓ Supports and maintains healthy root mass development
- ✓ Maintains leaf water content under stress
- ✓ Maintains chlorophyll content under stress
- ✓ Compatible to be mixed with other commonly applied products in turf

Key Benefits

- Visual improvement in response to negative environmental conditions
- Improved turf quality under less-than-ideal water conditions, improved turf aesthetics
- Healthy green coloration and improved visual response to consumers
- Simple; saves time, money and effort
