Linchpin™

Active Ingredients: Mesotrione 8.7%, Halosulfuron-methyl 4.1%, Quinclorac 62.53%

Performance. Flexibility. Aesthetics.

Linchpin™ patented herbicide is for use on golf courses, sports fields, lawns, and sod production. Supports Bermudagrass, ryegrass, fescue and ~~kentucky~~ bluegrass (excluding bentgrass). It effectively controls key weeds like kyllinga and other sedges, crabgrass, nimblewill, and 40+ broadleaf weeds.

Linchpin's flexibility sets it apart from other turf herbicides. Here's why: Linchpin allows you to safely add an additional 4 oz per acre of ~~Slipstream~~ mesotrione ~~Herbicide~~ to gain greater control of difficult weeds like nimblewill and larger crabgrass, without affecting turf safety or bleaching on traditionally sensitive ryegrass, tall fescue, and Bermudagrass.

FEATURING

- ✔ **Long-lasting protection:** Delivers up to 30 days of residual control for extended weed suppression and cleaner turf
- ✔ **Patented safety innovation:** Unique formulation minimizes or eliminates bleaching commonly seen with mesotrione products, ensuring exceptional turf safety

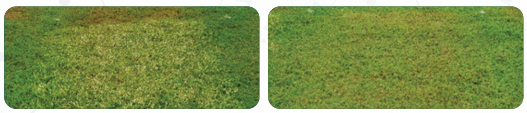

Key Benefits

- **Broad-spectrum performance:** Controls tough-to-manage weeds including kyllinga, nutsedge, crabgrass, signalgrass, and nimblewill, plus more than 40 additional broadleaf and grass weeds.
- **Unmatched versatility:** The only mesotrione-containing herbicide labeled for use on Bermudagrass, making Linchpin a perfect fit for cool-season overseed programs.
- **Operational efficiency:** A convenient dry formulation improves ROI by reducing tank mixing, prep time, and potential mixing errors.

Linchpin™ | Active Ingredients: Mesotrione 8.7%, Halosulfuron-methyl 4.1%, Quinclorac 62.53%

Linchpin™ + SlipStream™

Superior Weed Control and Flexibility

Nimblewill is a weed that normally requires two separate applications to achieve full control. In recent trials, a sequential program of Linchpin tank-mixed with an additional 4 oz of SlipStream™ mesotrione performed comparable to a sequential 8 oz mesotrione program for control of nimblewill. And a single application of Linchpin™ with the additional 4 oz of Slipstream outperformed the industry standards for kyllinga and large crabgrass control. The flexible Linchpin program provides unparalleled weed control for some of the most difficult-to-control weeds, without the usual turf bleaching effect.

~~Key weed performance against the competition~~
