

TRUMPET® EC | Active Ingredient: Naled 78.0%

The Leading Mosquito A.I. for Aerial Applications

TRUMPET® EC insecticide contains the active ingredient naled, which is the leading mosquito active ingredient for aerial applications and is ideally suited for public health or mosquito abatement programs. It is extremely effective at controlling mosquitoes (even populations that have developed resistance to pyrethroids), flies, and other labeled pests, with minimal environmental persistence. Trumpet EC insecticide contains an emulsifier so spray systems can be flushed with water after application.

FEATURING

- ✓ IRAC Group 1-B Insecticide
- ✓ Mode of action: Naled, an organophosphate insecticide, works by inhibiting acetylcholinesterase and ultimately paralyzing insect nervous systems
- ✓ Comes in returnable 30-gallon drums with Micromatic fittings for added handler safety
